Web-Empowered Church
a Ministry of Christian Technology Ministries International, Inc. (CTMI)

The internet is the one of the most powerful communication technologies ever invented. In all aspects of our lives -- business, leisure, education, etc. -- the internet is impacting the way we do much of what we do. In addition, the internet has connected the world together like no other technology. Unfortunately, the Church has been slower to capitalize on the power of internet technology. This may be partly due to its conservative nature, but we also know that internet ministry is new and different. Most churches and other Christian ministries are not educated on what internet ministry can do for them and how to make it happen. WEC is helping the Church understand and effectively apply advanced web technology to amplify the Church's impact in the world.

WEC is innovatively applying internet technology to empower most ministry activities in the Church such as evangelism, teaching, preaching, care, community, and administration. And WEC is making those powerful web-ministry features available to churches and Christian organizations around the world. As WEC helps web-empower ministries worldwide, we help amplify the ministry impact of those ministries.

Together we can change the world for Jesus Christ!

Learn More
Please visit our website for more informaton: **www.WebEmpoweredChurch.org** or email us at **Info@WebEmpoweredChurch.org.**

Free to Use
We offer a free and open-source web-ministry system called "Web-Empowered Church" or just "WEC." The WEC Starter Package with its many powerful ministry-enhancing features comes with free online documentation, training, and support.

Personalized Services
We also offer personalized services that can accelerate the process of web-empowering your organization including website hosting, moving content to your new website, custom template designs, technical support, and training.

Funding
All proceeds from donations and paid services go back into this ministry to expand our ability to serve our large and growing worldwide user community.

Our Goal
Our goal is to change the world for Jesus Christ by helping expand the impact of thousands of Christian ministries across multiple denominations, races, and cultures. Simply put, **we are here to web-empower the Church!**

Our Organization
WEC is a ministry of Christian Technology Ministries International, Inc. (CTMI). CTMI exists to help Christian churches, organizations, and individuals use technology to spread the gospel of Jesus Christ around the world. CTMI is a non-profit organization.

Our Team
The CTMI team is made up of passionate Christians with unique advanced technology and ministry skills. Most are degreed engineers and information technology professionals, and some are pastors, authors, and inventors.
